

Oetiker Medical Grade Pneumatic Pincer ME/EL

Paint-free with Medical Lubricant

Features and Benefits

- 1. High process reliability:**
release mechanism designed to prevent misoperation
- 2. Reliable assembly:**
complete pincer system ensures efficient & uniform assembly
- 3. Easy handling:**
lightweight and ergonomic design for one-handed operation
- 4. Broad applicability:**
full range of pincer heads for compatibility to all standard clamps
- 5. Customizable heads:**
different pincer head designs according to application
- 6. Paint-free body:**
to avoid particulate contamination
- 7. Medical Grade lubricant:**
to comply with medical and clean room standards

Components:

- A** Wide range of bodies and heads
- B** Special Medical Grade lubricant inside
- C** Paint-free body
- D** Engraved product information

The pincer body is paint-free to avoid any potential contamination of clean rooms. It is treated with a special Medical grade lubricant certified by USP 88 Class VI and ISO 10993-5 to comply with Medical Standards. To maintain traceability, the relevant information is laser marked directly onto the pincer body.

Oetiker Medical Grade Pneumatic Pincer ME/EL

Paint-free with Medical Lubricant

As a global leader in high-value connecting solutions, our expertise in high-quality clamps, rings, and assembly tools supports customers in various medical applications such as Biopharma manufacturing, medical devices, and health & safety devices.
